

BATTERYjumpstart 1250A

Starts depleted batteries (BOOST to 0V)

The BOOST function lets users restart many vehicles even from completely discharged batteries

Tyre Inflator

Inflate tyres quickly. Spark-proof smart clamps with reverse-polarity detection and advanced protection systems

Power Pack

Charge devices fast using the built-in USB ports

Built-in LED work light for improved visibility during operation

Ensures clear visibility in low-light or emergency situations, helping users work reliably at any time

Powerful jump-starting with integrated tyre inflation and enhanced safety features

The OSRAM BATTERYjumpstart 1250A provides strong, reliable jump-starting for many 12V vehicles with engines up to 6.0L petrol and 2.8L diesel. With 1250A peak current and a BOOST function, it can start fully depleted 0V batteries. Smart clamps with built-in safety features including reverse polarity, anti-spike and short-circuit protection ensure a simple connection, supported by clear audio and visual indicators.

An integrated tyre inflator delivers fast inflation from 0–35 psi (2.4 bar) in around 3.5 minutes, helping drivers manage routine top-ups or emergency low-pressure situations. USB-C and USB-A ports provide convenient charging for many mobile devices on the move. A built-in LED light enhances visibility in dark conditions, and integrated storage keeps accessories organized. The unit comes with a soft storage case for easy transport in the vehicle.
